Reporting Period	Work completed	Work to be completed next RP	What's going well and why:	What's not going well and why:	Suggestions/Issues	Project Changes (if any)	Signature by Project Manager/Team Leader
August 16 - 26	The team contacted Edispo Philippines for the possible partnership.	Making revisions of our previous Chapter 1-3 on Methods of Research due to necessary content changes,	The team keeps researching more studies related to the topic and also sent a different advisers to be the team's technical adviser.	The team haven't received any confirmation from the advisers we reached out to.	Revisions of Chapter 1 - 3	N/A	
August 27 - September 2	Engr. Rosalina R. Estacio has agreed to be the team's technical adviser and has signed the acceptance form.	Revising the newly added content in Chapters 1 - 3 is still in progress.	The team has now a technical adviser, allowing us to commence consultations for the revisions of Chapter 1 - 3	N/A	Revisions of Chapter 1 - 3	N/A	
September 3 - 9	The team submitted the updated Chapter 1 - 2.	Revising some parts of Chapter 1 based on the comments provided by our technical adviser and continue working the Chapter 3.	The input from our technical adviser greatly aided the team in understanding the potential results of the development of the machine.	The team has minor revisions on Chapter 1 that need to work on.	The technical adviser recommends the team to explorer Flutter and Thunkable for the development of the mobile application part. Additionally, we can start the learning process for the configuration of each component's of the machine development.	N/A	
September 10 - 20	The team consulted the revised Chapter 1 the technical adviser.	Revising some parts of Chapter 1 based on the comments provided by our technical adviser and continue working the Chapter 3.	The input from our technical adviser greatly aided the team in understanding the potential results of the development of the machine.	The team has minor revisions on Chapter 1 that need to work on.	The technical adviser suggested to limit the words in the objectives of the study section.	N/A	
September 21 - 29	Submitted the completed Chapter 1-3	The team should make revisions to Chapter 3 based on the suggestions of the technical adviser.	The team understood the suggestions of the technical adviser's feedback.	There are many revision and added section in Chapter 3.	sted revisions: <ul style="list-style-type: none"> <li>• Cite sources or reference for the electronic waste pricelist</li> <li>• Revised the block diagram</li> <li>• Add flowchart per module</li> <li>• Change the CNN Model figure</li> <li>• Tentative Prototype design with labeled parts</li> <li>• Sample IoT design interface</li> <li>• Sample mobile app interface</li> </ul>	N/A	

October 10	The team defended the thesis title.	The panelists suggests to me make revisions on some parts of the Chapters 1-3 according to their feedback.	The insights of the panelists during the defense guides the team towards enhancing the development of the machine.	The panelists approved the thesis title but the team has many revisions on the paper that need to work on within the week.	uggested revisions: <ul style="list-style-type: none"> <li>For the reward system monitoring, web application instead of mobile application</li> <li>Remove the temperature sensor</li> <li>Revise the flowchart per rule</li> <li>Depositing of points accumulated is by batch process</li> <li>Proper spacing of the lines</li> <li>Table should have discussions after</li> <li>Limit to 5-6 e-waste list</li> </ul>	For the reward system monitoring, instead of mobile application, the panelists suggested to change to web application.	
October 11 - 17	Engaged in discussion with the technical adviser for our completed revised paper.	Submit the revised paper to the panelist through email.	The team completed the revisions within the week.	N/A	The technical adviser suggested to have a main flowchart of the system, showing the sub-modules.	N/A	
October 18 - 31	Emailed the revised paper to the panelists.	N/A	N/A	Due to busy schedules of the panelists, it take some time to review the team's revised paper.	N/A	N/A	
November 1 - 8	The team had discussion with the panelists to address their additional comments and to clarify on certain changes in the reward system part of the development.	Revised some parts of the paper that the panelists have commented.	The team has a clearer understanding of the panelists' recommendations.	The submisison of the compliance form for the team is delayed as consequence of the delayed comments.	uggested revisions: <ul style="list-style-type: none"> <li>Consistent font size and line spaces on the paper</li> <li>The sub-module flowchart does not start with "Start" and ends with "End". The start and end terminals are only used in the main system flowchart.</li> <li>Discuss the equation based on its used</li> <li>Admins will notify only if the users reached 100 points or greater.</li> </ul>	N/A	
November 9 - 15	The revisions for chapters 1-3, as suggested by the panelists, have been completed. Additionally, the team has submitted the project Gantt chart and work breakdown structure.	Revisions of Project Gantt Chart and Work Breakdown Structure	The revisions for Chapters 1-3 have been completed, and we are currently awaiting the signatures of the panelists for the compliance and synthesis form.	The panelists have not yet signed the synthesis and compliance forms.	N/A	N/A

Reporting Period	Work completed	Work to be completed next RP	What's going well and why:	What's not going well and why:	Suggestions/Issues	Project Changes (if any)	Signature by Project Manager/Team Leader
August 16 - 26	Contacted the Edispo Philippines for the possible collaboration.	Making revisions to Chapter 1 - 3 because some contents needs to be changed.	The team is ongoing with their research that are related to the proposed topic and also the team sent technical adviser proposal to different professors.	There's no definite response from the technical adviser that team contacted.	Revisions of Chapter 1 - 3	N/A	
August 27 - September 2	The proposal was accepted by Engr. Rosalina Estacio, who was officially endorsed her role as the team's technical advsier by signing the acceptance form.	On going work to modify the additional content in our Chapters 1-3.	The team can start seeking advices from the technical advisers for the revisions.	N/A	Revisions of Chapter 1 - 3	N/A	
September 3 - 9	The updated Chapter 1-2 has been submitted by the team.	Modifying some sections of the Chapter 1 according to the feedback from our TA and continue working the Chapter 3.	Our technical adviser's comments ang suggestions provided valuable insights into the outcome of the machine.	There are a little revisions on Chapter 1 based on the comments of our technical adviser that need to be addressed.	For the development of the mobile application, the technical adviser suggest to try Flutter and Thunkable. Also, we can commence learning the interface and configuration of each component for the development of the machine.	N/A	

September 10 - 20	The revised Chapter 1 was reviewed with the input from our technical adviser.	Modifying some sections of the Chapter 1 according to the feedback from our TA and continue working the Chapter 3.	Our technical adviser's comments and suggestions provided valuable insights into the outcome of the machine.	There are a little revisions on Chapter 1 based on the comments of our technical adviser that need to be addressed.	Our technical adviser recommended condensing the word count in the objectives of the study.	N/A	
September 21 - 29	Submitted the completed Chapter 1 -3	Revisions of Chapter 3 according to the comments of our TA.	The team gained clarity through the comments of the technical adviser.	A lot of revisions with Chapter 3.	<p>Requested revisions:</p> <ul style="list-style-type: none"> <li>• Cite sources or reference for the electronic waste pricelist</li> <li>• Revised the block diagram</li> <li>• Add flowchart per module</li> <li>• Change the CNN Model figure</li> <li>• Tentative Prototype design with labeled parts</li> <li>• Sample IoT design interface</li> <li>• Sample mobile app interface</li> </ul>	N/A	
October 10	Thesis title defended.	Revise certain parts of the Chapter 1-3 based on the comments provided by the panelists.	The panelists' contributions during the defense benefited the team as their ideas would help to the progress and improvement of the project.	The panelists have indicated that are remark is "Passed with Revisions". They prefer to review the expected revisions within the week so the group will work on that.	<p>Suggested revisions:</p> <ul style="list-style-type: none"> <li>• For the reward system monitoring, web application instead of mobile application</li> <li>• Remove the temperature sensor</li> <li>• Revise the flowchart per module</li> <li>• Depositing of points accumulated is by batch process</li> <li>• Proper spacing of the lines <ul style="list-style-type: none"> <li>• Table should have discussions after</li> <li>• Limit to 5-6 e-waste list</li> </ul> </li> </ul>	For the reward system monitoring, instead of mobile application, the panelists suggested to change to web application.	
October 11 - 17	Completed the revised paper and consulted with the technical adviser.	Send the revised paper to the panelists through email.	Our revisions were finished within the week.	N/A	The technical adviser recommended creating a main system flowchart that illustrates the sub-modules.	N/A	
October 18 - 31	Sent the revised paper to the panelists.	N/A	N/A	The panelists are dealing with a busy schedule so it take some time to comment on our revised paper	N/A	N/A	

November 1 - 8	A discussion between the team and the panelists to elaborate their additional comments and to make clarification in certain suggested changes.	The team will incorporate changes into the paper, considering the comments of the panelists.	The team acknowledges the suggestions of the panelists.	The team is behind schedule in submitting the compliance form.	suggested revisions: <ul style="list-style-type: none"> <li>• Consistent font size and line spaces on the paper</li> <li>• The sub-module flowchart does not start with "Start" and ends with "End". The start and end terminals are only used in the main system flowchart.</li> <li>• Discuss the equation based on its used</li> <li>• Admins will notify only if the users reached 100 points or greater.</li> </ul>	N/A	
November 9 - 15	Revising the paper from chapter 1-3, following the panel comments. Also did the website for our proposed project.	Finalizing the website that contains the details about our proposed project	Completed the revisions on the paper and did the initial website	Getting the panels signs the compliance and synthesis form	N/A	N/A

Program: BSCpE		Course/Subject: CPE C403 - 4 Section: 401G			SY & Semester: 2023-2024		
Reporting Period	Work completed	Work to be completed next RP	What's going well and why:	What's not going well and why:	Suggestions/Issues	Project Changes (if any)	Signature by Project Manager/Team Leader
August 16 - 26	Proposed a partnership with Edispo Phillipines.	Making revisions on our Chapter 1 - 3 because there are contents that require modification.	The team persists in researching further into the related topic. The team also sent a proposal to the technical adviser we wanted.	We are still waiting for the confirmation from the technical adviser we got in touch with.	Revisions of Chapter 1 - 3	N/A	
August 27 - September 2	Engr. Rosalina R. Estacio has agreed to be our technical adviser and has signed the acceptance form	Continuing the process of revising for the contents of Chapter 1 - 3	Having a technical adviser now enables the team to have consultations for the revisions.	N/A	Revisions of Chapter 1 - 3	N/A	
September 3 - 9	Chapter 1-2 has been submitted by the team.	Making some changes to specific parts of Chapter 1 as per the suggestions from the TA.	The recommendations from our technical adviser proved instrumental in giving us a clear picture of what to expect from the development of the machine.	We have some slight revisions that need to be made.	The technical adviser advises trying out Flutter and Thunkable for the mobile application. It has been also suggested to learn how to configure the interface of each components of the machine.	N/A	
September 10 - 20	Consultation with our technical adviser took place regarding the comments for the Chapter 1 from last week.	Making some changes to specific parts of Chapter 1 as per the suggestions from the TA. Also, continue working on the Chapter 3.	The recommendations from our technical adviser proved instrumental in giving us a clear picture of what to expect from the development of the machine.	We have some slight revisions that need to be made.	Our technical adviser suggested to keep the objectives of the study section concise by limiting the number of words.	N/A	
September 21 - 29	Submitted the completed Chapter 1-3	Based on the feedback of our technical adviser, we have a lot of revisions and added contents on Chapter 3.	The team agreed with the comments of our technical adviser. This would help the team to finish the Chapter 3.	Many revisions to be made with Chapter 3.	sted revisions: <ul style="list-style-type: none"><li>• Cite sources or reference for the electronic waste pricelist</li><li>• Revised the block diagram</li><li>• Add flowchart per module</li><li>• Change the CNN Model figure</li><li>• Tentative Prototype design with labeled parts</li><li>• Sample IoT design interface</li><li>• Sample mobile app interface</li></ul>	N/A	

October 10	We defended our thesis title.	Make revisions of the Chapters 1-3 based on the comments of the panelists.	The ideas articulated by the panelists during the defense helped in advancing the team's effort in developing the machine.	Even though the panelists approved the thesis title, there are extensive revisions that needs attention and effort of the team	suggested revisions: <ul style="list-style-type: none"> <li>• For the reward system monitoring, web application instead of mobile application</li> <li>• Remove the temperature sensor</li> <li>• Revise the flowchart per rule</li> <li>• Depositing of points accumulated is by batch process</li> <li>• Proper spacing of the lines</li> <li>• Table should have discussions after</li> <li>• Limit to 5-6 e-waste list</li> </ul>	For the reward system monitoring, instead of mobile application, the panelists suggested to change to web application.	
October 11 - 17	Completed the panelists' suggestions on our paper and consulted the technical adviser.	Email the revised paper to the panelists.	Accomplished the revisions suggested by the panelists within the week.	N/A	As per the technical adviser's suggestions, include a main system flowchart highlighting the sub-modules.	N/A	
October 18 -31	Submitted the revised paper to the panelists.	N/A	N/A	The panelists are having hectic schedules to provide comments on our paper.	N/A	N/A	
November 1 - 8	The team had discussion to obtain extra clarification on specific changes made to the project.	The team will modify certain parts of the paper based on the insights of the panelists.	The team is aligned with their vision for the project's outcome to the suggestions from the panelists.	The delay in receiving comments from the panelists has resulted in late submission of the compliance form.	suggested revisions: <ul style="list-style-type: none"> <li>• Consistent font size and line spaces on the paper</li> <li>• The sub-module flowchart does not start with "Start" and ends with "End". The start and end terminals are only used in the main system flowchart.</li> <li>• Discuss the equation based on its used</li> <li>• Admins will notify only if the users reached 100 points or greater.</li> </ul>	N/A	
November 9 - 15	Project Gantt Chart & WBS	Revision of Gantt chart and WBS	The team completed all the suggested revision on the paper	Waiting for panelists reponse for the submission of signed project synthesis form.	N/A	N/A

Reporting Period	Work completed	Work to be completed next RP	What's going well and why:	What's not going well and why:	Suggestions/Issues	Project Changes (if any)	Signature by Project Manager/Team Leader
August 16 - 26	Reached out to Edispo Philippines about the possible partnership.	Revising the Chapter 1 - 3 because there are contents that need to be changed.	The planning of the research is going well for our group because we have already working on the things we have to put in our documents.	There's still no confirmation for the TAs we contacted.	Revisions of Chapter 1 - 3	Currently, there are no changes except for the revision of Chapter 1 - 3	
August 27 - September 2	The team's technical adviser position has been accepted by Engr. Rosalina R. Estacio.	The revisions of the added content in Chapters 1-3 is ongoing.	The team can start consulting for the revisions of the Chapters 1-3	N/A	Revisions of Chapter 1 - 3	N/A	
September 3 - 9	We already submitted the updated Chapter 1-2	The chapter 1 is to be revised according to the comments and suggestions of our technical adviser.	The advice from our technical adviser was beneficial in helping us grasp the projected outcome of the development of the machine.	We have minor revisions that needs to work on.	It has been suggested to try Flutter and Thunkable for the development of the mobile application. In addition, the team can start to learn how to configure the components needed for the machine.	N/A	
September 10 - 20	The team discussed the updated Chapter 1 with the technical adviser.	The chapter 1 is to be revised according to the comments and suggestions of our technical adviser. Also, finished the Chapter 3.	The advice from our technical adviser was beneficial in helping us grasp the projected outcome of the development of the machine.	We have minor revisions that needs to work on.	Paraphrase and limit the number of words in the objectives of the study.	N/A	
September 21 - 29	Submitted the completed Chapter 1-3	Revised the Chapter 3 according to the comments of the technical adviser.	The team found enlightenment from the technical adviser's comments.	Revisions to Chapter 3 and additional sample interfaces of the project.	suggested revisions: <ul style="list-style-type: none"> <li>• Cite sources or reference for the electronic waste pricelist</li> <li>• Revised the block diagram</li> <li>• Add flowchart per module</li> <li>• Change the CNN Model figure</li> <li>• Tentative Prototype design with labeled parts</li> <li>• Sample IoT design interface</li> <li>• Sample mobile app interface</li> </ul>	N/A	

October 10	The team defended the thesis title and approved by the panelists.	Modify some parts of the Chapter 1-3 in accordance with the comments given by the panelists.	The development of the machine has positive advancements because of the valuable input provided by the panelists during the defense for more effective outcome.	The panelists approved the thesis title but the team has many revisions on the paper that need to work on within the week.	Suggested revisions: • For the reward system monitoring, web application instead of mobile application • Remove the temperature sensor wchart per module • Depositing of points accumulated is by batch process • Proper spacing of the lines • Table should have discussions after • Limit to 5-6 e-waste list	For the reward system monitoring, instead of mobile application, the panelists suggested to change to web application.	
October 11 - 17	Completed the revised paper and we have consulted our technical adviser before submitting it.	Email the revised paper to the panelists.	Finished the revisions within the week.	N/A	Incorporate a main system flowchart with the breakdown of sub-modules.	N/A	
October 18 - 31	The team sent an email to the panelists attaching the revised paper.	N/A	N/A	The panelists are currently taking time to respond to provide comments in our revised paper.	N/A	N/A	
November 1 - 8	The team had discussions with the panelists to gain insights into their additional comments.	The team will make revisions to certain sections of the paper in response to the feedback of the panelists.	The team understands the expectations of the panelists for the project's outcome.	The submission of the compliance form is delayed due to the late responses of the panelists.	Suggested revisions: • Consistent font size and line spaces on the paper • The sub-module flowchart does not start with "Start" and ends with "End". The start and end terminals are only used in the main system flowchart. • Discuss the equation based on its used • Admins will notify only if the users reached 100 points or greater.	N/A	
November 9 - 15	We have revised our paper based on the changes given by our panelists. We also made the Work Breakdown Structure together its Gantt Chart.	Revise the Work Breakdown Structure and Gantt Chart	We already fixed the changes needed for our paper.	We haven't received the signatures of the panelists.	N/A	N/A

<b>Title of Design Project Proposal: E-COLLECT: DESIGN AND DEVELOPMENT OF ELECTRONIC WASTE REVERSE VENDING MACHINE</b>	
<b>Project Features/Description</b>	
Implement a system for effectively classifying e-waste items	
Develop a machine framework that is capable of storing and accepting various e-waste items	
Incorporate a machine's touchscreen display for electronic device deposits	
Develop algorithm to differentiate types of electronic devices	
develop a reward system that incentivizes users to dispose their electronic waste.	
A user-friendly web application that allows users to monitor rewards they have earned from the machine.	
Creation of a admin dashboard to manage and monitor the incentive system, including users accounts, reward distribution, and system maintenance.	
Incorporate Internet of Things sensors to track the bin's capacity.	
Provide a system that notifies the admin panel in real-time of the fill level of the bin.	
Provide alerts for admins when the machine fills to a certain level to perform maintenance.

To: Elizher James Ursabia<elizherjames.ursabia@my.jru.edu>

CC: <jesse.delacruz@jru.edu>, <amor.ellares@jru.edu>

Follow proper line spacing. Uponchecking, aside from multiple line spaces, there's also 0.15pt space after each line. Also, make sure the font and font size are consistent with the required format.

☐ Mirror indents

Spacing

Before:0 pt

After:0.15 pt

Line spacing:Multiple

At:2.01

☐ Don't add space between paragraphs of the same style

## COMPLIANCE AND SYNTHESIS FORM

E-XPLORERS WITH TA

Elizher

since oct. 21 maam nagreach out na po kami. then yung pinakahuli po namin na reach out sa panelists is nov. 19 po kase nag bago po kami ng mga revisions nila. nag wait po kami for 10 days, di rin po sila nag respond. ito po proof

Elizher

Dec 1, 2023, 9:24 AM

Sally

send an email as a gentle reminder do not sound demanding

Sun 9:22 PM

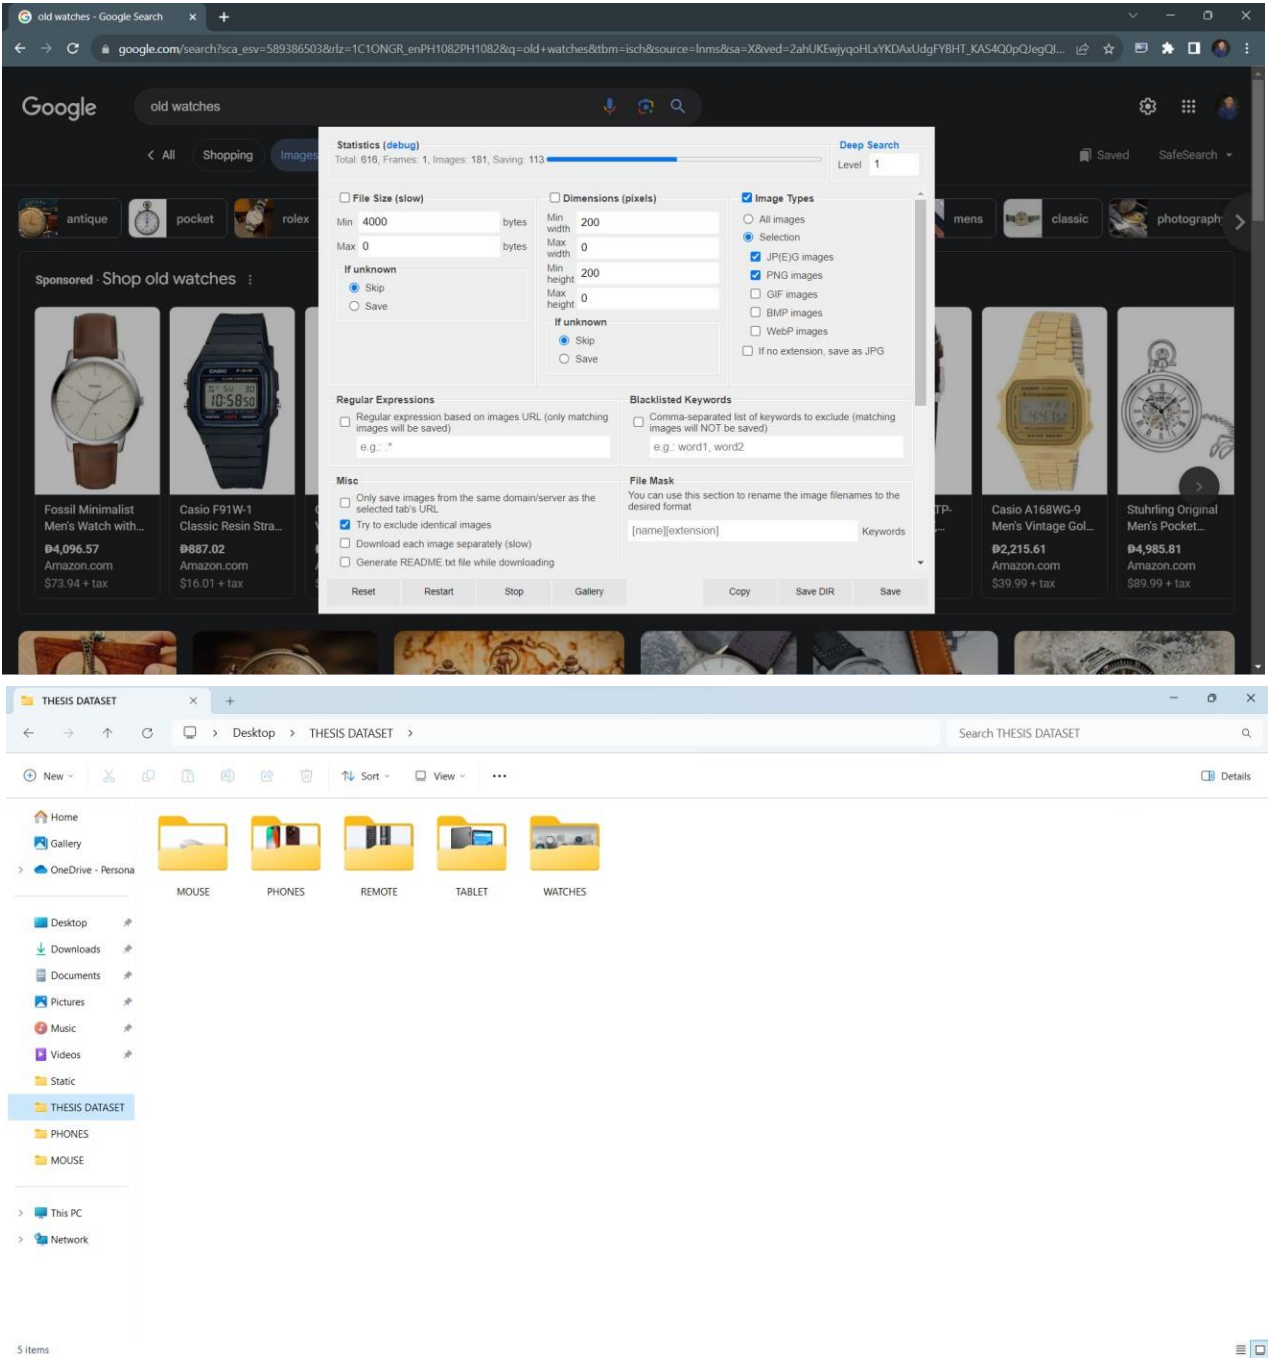

Ma'am @Sally Estacio wala pa rin po paramdam mga panels even po sa pm.

Aa

DATASET CREATION

## INITIAL INTERFACE OF WEB APPLICATION

The image displays the initial interface of the E-Collect web application, showing both the user-facing registration page and the underlying HTML/JavaScript code in a code editor.

**Web Application Interface (Top):**

- Header:** The page has a teal background on the left with a logo consisting of a green leaf and a white gear, with the text "E-COLLECT reverse vending machine" below it.
- Register Form:** A white form titled "Register" is positioned on the right. It contains the following fields:
  - Username
  - G-Cash Account Name
  - G-Cash Account Number
  - Email
  - Password
  - Confirm Password
  - Upload G-Cash Account QR Code Screenshot: (Choose File) No file chosenA black "Submit" button is located below the form.
- Footer:** A link "Have an account? Log in" is located at the bottom right of the form area.

**Code Editor (Bottom):**

The code editor shows the source code for the `register-user.html` file. The code includes the following elements:

- HTML Structure:** The code defines the `body` of the HTML document.
- JavaScript (Module Script):**
  - Imports Firebase SDKs from `https://www.gstatic.com/firebasejs/10.7.0/firebase-app.js`, `https://www.gstatic.com/firebasejs/10.7.0/firebase-database.js`, and `https://www.gstatic.com/firebasejs/10.7.0/firebase-storage.js`.
  - Initializes Firebase with a configuration object:

```
const firebaseConfig = {
  apiKey: "AIzaSyC_7uJfE39I6c0kzMB0cgwtoG-Oxzb1_hw",
  authDomain: "e-collect-database.firebaseio.com",
  databaseURL: "https://e-collect-database-default-rtdb.asia-southeast1.firebaseio.com",
  projectId: "e-collect-database",
  storageBucket: "e-collect-database.appspot.com",
  messagingSenderId: "382486660716",
  appId: "1:382486660716:web:79fd76565b4290d1643a49"
};
```
  - Initializes the Firebase app: `const app = initializeApp(firebaseConfig);`
  - Gets references to the database and storage: `const db = getDatabase(app);` and `const storage = getStorage(app);`
  - Attaches an event listener to the "registerForm" submit button:

```
document.getElementById("registerForm").addEventListener("submit", async function (e) {
  e.preventDefault();

  const password = document.getElementById("password").value;
  const confirmPassword = document.getElementById("confirm-password").value;

  if (password !== confirmPassword) {
    alert("Passwords do not match.");
    return;
  }

  const username = document.getElementById("username").value;
  const userRef = ref(db, 'users/' + username);

  // Handle file upload to Firebase Storage
  const gcashQRCode = document.getElementById("gcash-qr-code").files[0];
```
